Dear Sir:

Applicant, through its attorney of record, represents that it is the owner of the entire interest in the above-identified patent application because the Applicant is the sole inventor of the above-identified patent application and has not assigned any interest to any other person or entity.

Applicant, hereby disclaims, except as provided below, the terminal part of any patent granted on the above-identified application that would extend beyond the expiration date of the full statutory term of United States Patent Application Serial No. 10/229,198, which was filed on August 27, 2002, as presently shortened by any terminal disclaimer. Applicant agrees that any patent so granted on the above-identified application shall be enforceable only for and during such period that the legal title to it and the prior patent are commonly owned. This agreement is to run with any patent granted on the above-identified application and is to be binding upon the grantor, its successors or assigns.

Applicant, however, does not disclaim any terminal part of any patent granted on the above-identified application prior to the expiration date of the full statutory term of the prior patent in the event that it later: expires for failure to pay a maintenance fee, is held unenforceable, is found invalid by a court of competent jurisdiction, is statutorily disclaimed in whole or terminally disclaimed under 37 CFR § 1.321(a), has all claims canceled by a reexamination certificate, is reissued or is otherwise terminated prior to expiration of its statutory term as presently shortened by any terminal disclaimer, except for the separation of legal title stated above.

Applicant hereby declares that all statements made herein of its own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.
